Subject: BP spill in Lake Michigan

I have a few questions about the spill. My deadline is 5 p.m. Central.

Any estimate to how much was spilled?

What was the cause of the spill?

Has the leak been shut off?

What area of Lake Michigan was it spilled into and how far has it spread?

What efforts are being made to clean/contain it?

How much has been collected?

What type of oil was spilled, if known?

There were reports of a sheen overnight. Was that cleared up this morning?

Thanks so much. Please feel free to add anything you think is relevant.
